DETAILED ACTION

Allowable Subject Matter

Claims 12-17 and 19-21 are allowed.

The following is an examiner's statement of reasons for allowance: Dougherty does not disclose nor suggest a first calculation device or process that calculates the amount of low frequency correction that is corrected by a low frequency correction device according to the ratio of the low frequency component extracted by an extraction device and an adjustment amount, as required by claims 12 and 20. Dougherty discloses a noise estimation system for a vehicle audio system comprising low and high frequency correction devices 114L and 114H, however, there is no suggestion of calculating the amount of low frequency correction based on the ratio of a low frequency component extracted by an extraction device (microphone and low pass filter) and an adjustment amount. While Kato discloses an extraction device (microphone 20 and low pass filter 22) and calculates the amount of low frequency correction based on the ratio of the output from the extraction device and an adjustment amount, there is no disclosure of a second calculation device that calculates the amount of high-frequency correction that is corrected by the high frequency correction device according to detected vehicle speed, as also required by claims 12 and 20.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
